Vietnam

Rice Price - Weekly

Situation for the Week Ending November 19, 2010

Approved By:

Michael Riedel

Prepared By:

Quan Tran

Report Highlights:

Exporters' price offers were almost unchanged last week for 5 percent broken rice and 10 percent broken rice. Prices for 15 percent broken rice and 25 percent broken rice were slightly down, due to higher quantities of these types being available within the newly harvested crop.

Local paddy prices were unchanged last week. Despite the nearly completed harvest of the late Autumn rice crop in the Mekong River Delta, the strong buying demand to fulfill outstanding export shipments has supported the high local paddy prices.
